APPENDIX A

APPENDIX A - Be safe around commercial shipping.

Due to the density of traffic, shipping channels and their approaches are areas where the interaction between large ships and small craft can be particularly hazardous. Small boat operators should exercise caution in the vicinity of these areas and must avoid impeding the passage of vessels which can safely navigate only within the confines of a shipping channel or fairway. This is true when yacht racing and when travelling to and from.

Due to the speed of approach of commercial shipping it is important to keep a good lookout astern as well as ahead. Constant bearings between vessels are an indicator of a collision course.

When taking action to avoid a collision, avoid small alterations of course and speed, make bold alterations to make it readily apparent to the commercial vessel you are keeping well clear – do not leave action to the last minute as when sailing close to a large vessel its size could well rob a yacht of the wind, making it difficult to manoeuvre at a potentially critical moment in the interaction between the two vessels.

If you are hearing 5 or more short horn blasts from a commercial vessel, you are already too close and/or your intentions are not clear.

Regarding communication, each boat is required by Special Regulations Category 6 to carry a VHF radio in working order. The Race Committee will be communicating to competitors on Ch 69 which may include important race information and navigational warnings. It is highly recommended that it is switched on and monitored. If a competitor wishes to communicate with a ship or listen to traffic information from Melbourne VTS, they may do so on Ch 12. If a boat is fitted with Automated Identifying System (AIS) it is highly recommended that it is switched on and monitored.

Attention is drawn to Harbour Master's Directions Section 5 which states among other things that all recreational vessels shall keep clear of all commercial vessels over 50m, if in doubt assume it is over 50m, and all tugs and line boats assisting in the movement and berthing of another vessel.

Attention is also drawn to International Rules for the Prevention of Collision at Sea Rule 5 - Lookout
